

ABSORBAG COMPACT

Stop Moisture Damage In Your RV. Eliminate Mold and Mildew.

Specifically Designed for Use in Motor Homes, Campers and Trailers.

HOW IT WORKS

1. Calcium chloride (salt) behind an absorption grid aggressively removes moisture from the air.
2. Moisture turns into brine and is permanently trapped in a plastic collector—preventing re-evaporation and leaking (serious limitations of desiccant pouches).

ABSORBAG COMPACT A SUPERIOR SOLUTION FOR MOISTURE CONTROL

- Eliminates damaging mold, mildew, rust, corrosion and musty odors in your RV
- Continuous moisture protection while your RV is on the road or in storage
- Made of safe, non-toxic recyclable materials (PE-PP- plastics and Calcium Chloride [salt])
- One-time use with quick and easy installation, removal, disposal and replacement (see opposite side)
- **Capacity:** Contains 1.65 lbs. / 750 grams of Calcium Chloride (salt) that can absorb about 1/4 gallon of moisture
- **Size:** 32" long (with hook extended) and 5 1/4" wide

.....
**Low profile shape allows
Absorbag Compact to be hung
in any convenient place
inside your RV.**
.....

A Better Solution Than Standard Desiccant Pouches

Due to the pouch design, the desiccant is immediately over-exposed and moisture protection quickly declines. And daily temperature fluctuations always cause a re-release (re-evaporation) of absorbed moisture back into the air. At high levels of humidity, the pouch type desiccant also easily becomes over-saturated and usually leaks.

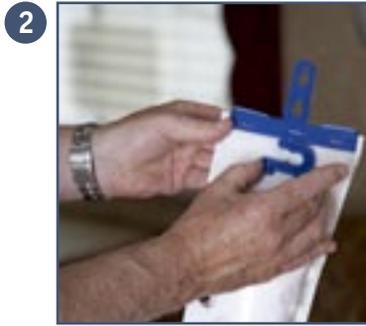

QUICK AND EASY INSTALLATION, REMOVAL, DISPOSAL AND REPLACEMENT.

To remove the Absorbag Compact from its outer protective sleeve, cut open the sleeve at the top, making sure not to cut into the Absorbag Compact.

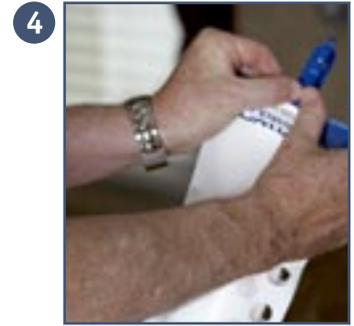

Loop the cable tie (included with your Absorbag Compact) loosely around a hook, closet rod or other type of sturdy fixture, making sure to leave room in the cable tie loop for the hook on the Absorbag Compact.

Twist the hook off from the back of the Absorbag Compact blue hanging bar ...

and fit it on the back of the non-printed side ...

by pushing it up in the slots until you hear a click.

Now hang the Absorbag Compact by its hook in the cable tie. Note: Absorbag Compact works best if there is air circulation around the entire unit.

Gently press the empty lower part of the Absorbag Compact from both sides to allow moisture to drip into the bottom half of the Absorbag Compact.

When the bottom half of the Absorbag Compact is full of water (and no salt remains in the upper half of the Absorbag), remove and replace with a new Absorbag Compact using the same cable tie.

ABSORBAG COMPACT USAGE RECOMMENDATIONS FOR RV STORAGE

RV SIZE	SEASON	RECOMMENDED NUMBER OF ABSORBAG COMPACT UNITS
Medium (15-30 ft.)	Low Humidity Season	1-2
	High Humidity Season	2-3
Large (30 + ft.)	Low Humidity Season	2-3
	High Humidity Season	3-4

Note: These recommendations are general guidelines only. You may need more or fewer units depending on your specific requirements.

ABSORBAG COMPACT PREVENTS MOISTURE DAMAGE IN BOATS AND SELF-STORAGE UNITS TOO.
